

LEAK SEEKER

NON-DESTRUCTIVE MOISTURE DETECTION AND LEAK TRACING IN FLAT ROOFING

Order #153-007

Locating moisture in flat roofing systems, tracking leaks and determining the cause of these problems can be difficult, time consuming and costly for the roofing contractor, consultant or maintenance engineer.

- Easy and safe to use
- No regulatory restrictions or operating license required
- Faster than other systems and functions during the day time hours
- Instant clear reading
- Works on smooth or ballasted roofing
- Inexpensive to purchase and operate

A portable hand held instrument for non-destructive surveying, moisture detection and leak tracking in built up and single ply roofing. Suitable for use on most types of roofing with a non-conductive roof membrane. It will detect through up to 50mm of gravel surfacing.

Specification

Dimensions: 125mm x 275mm x 70mm (4.75" x 11" x 3")

Weight: Including carrying case 1.8 kg (4lbs)

Power Supply: Two 9 volt batteries.

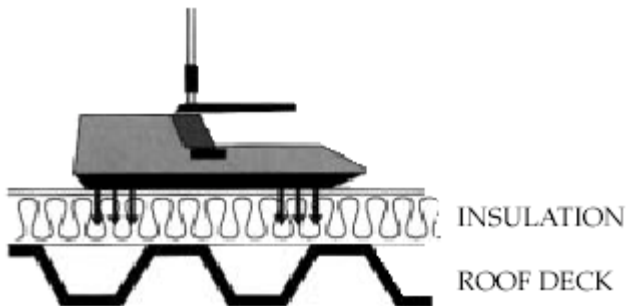

Sensitivity: From 2% moisture content.

Accessories: Comes complete with carrying case, telescopic handle, batteries and instructions.

Guarantee: Limited guarantee covers all parts and labor costs resulting from defects in materials or workmanship for a period of one year.

The **Leak Seeker** is ideal for:

- Leak tracking back to source
- Roof Moisture surveying
- Preventive maintenance programming
- Quality control and warranty auditing
- Monitoring repairs and re-roofing work.

The Leak Seeker will give vital information necessary to evaluate the condition of a roof at a low cost and without complications or restrictions.
