

EIFS Inspection Kit

Kit picture with optional Digital Hygrometer and optional Infrared Thermometer.

The Wet Wall Detector in combination with a Digital readout resistance type Wood Moisture Meter with special [EIFS Probes](#) with 7" long insulated pins. This kit offers the best solution for EIFS Moisture Inspection Protocols. Comes in a die cut, foam lined carrying case.

Order #[153-015](#)

EIFS Inspection Kit contains:

Wet Wall Detector

The Non-Destructive Moisture scanner that will read over 3 inches of Exterior EPS Insulation System.

Professional Wood Meter

A resistance type Wood Moisture Meter with special EIFS Probe with long insulated pins to verify moisture content and probe for structural integrity of the sheathing and wood framing.

Probes

Optional accessory for easy probing into materials up to 7". Accepts TP-30, SPI-52, SPI-90 and SPI-200 pins. Works with both [Compact](#) and [Professional](#) resistance meters.

Digital Hygrometer (Optional).

Gives relative Humidity, Temperatures and Dew point readings.

Infra-red Surface Thermometer (Optional)

For instant surface temperatures.
