

e2000™
MILLENNIUM SERIES DUROMETER

Model 400-511A Type A
(US patent 436874)

**Type A: For soft rubber, Elastomers, Waxes,
and Printina Rollers**

NEW DESIGN!

Model 511A is built to meet or exceed current ASTM D2240 Specifications for Type A durometers.

A written certification is **included** with all PTC® Digital Durometers from PTC Metrology®. Each certificate provides "as received" and "as left" data. The points calibrated are normally every ten points over the durometer's scale. Test blocks are not certifiable. Calibration reports are also available for DIN, JIS, ISO and proprietary standards. Other durometers can be certified on an as needed basis.

PTC Metrology® is an **A2LA Accredited Laboratory** for Durometer calibration. Certificate number 1896.01

- Testing of rubber, rubber like materials & soft plastics
- See Also 501A

e2000™ MILLENNIUM SERIES DUROMETERS are available in both analog and digital models.

Analog Durometers

Model	ASTM Type
501A	Type A
501B	Type B
502C	Type C
502D	Type D
501/O	Type O
502DO	Type DO

Digital Durometers

Model	ASTM Type
511A	Type A
511B	Type B
512C	Type C
512D	Type D
511/O	Type O
512DO	Type DO
