

C-2000- for Lint Cotton or Seed Cotton

Cotton

A moisture tester is a valuable tool during the ginning process and when buying or selling cotton. Cotton ginned at the appropriate level of moisture produces the longest and strongest fibers.

The newly designed C-2000 utilizes the relationship between moisture content and electrical resistance to effectively measure the moisture content of cotton fibers. Its functionally designed case with built-in handle puts controls at your fingertips.

Features:

- Microcontroller-based circuit for greater accuracy and reliability
- Two separate scales for testing lint cotton or seed cotton
- Set point with buzzer to alert you when a pre selected %MC has been reached
- Stores up to 100 readings and displays the average and highest of the stored readings
- Built-in calibration check

Specifications:

- Moisture Range: 4%-16-%, lint cotton; 6% 20%, seed cotton
- Size: 7 1/2" x 3" x 13/4"
- Battery: 9V Alkaline
- Warranty: 1 year
- Carrying Case: included

ELECTRODES

#202-52-E/C
Used for lint or seed cotton

#202-30-E/C
Used for bales, 9 1/2" insulated pins, with 8 1/4" penetration, eliminate the effect of surface moisture

#202-37-E/C
Used for yarn, 1 1/2" pins with 1" penetration

#202-830-T/C
Used for modules, heavy duty steel, 36" T-handle
