

638 Utilitycase

The 638 utilitycase with a customized 'pick and pluck' foam insert; here used as a product sample case.

The **utility case** bears its name well. Boasting the same standard features that make Plasticase products so reliable and durable (nylon latches and metal core hinges), it also offers plenty of interior space, making this product an ideal tool and equipment carrying case.

Also, a custom-fitted 'pick and pluck' foam insert is supplied with this product. 'Pick and pluck' means that you can pick the amount of foam you want removed from the case to suit your purposes, and pluck them out yourself in 1 inch square foam cubes.
